CLIENT SCHEDULING MONTHLY2 (SCHID=17)

FREQUENCY

This schedule contains all CS jobs which perform database updates & reports for the next month's redetermination. There are two reports produced from the schedule - a successful scheduled report (GCS130RA) & an error report (GCS140RA). If the workers have taken appropriate action with the pre-schedule reports created during CS Monthly1, the error report should be empty. The CS Monthly2 schedule runs on the 15th of the month or the prior business day if the 15th falls on a holiday or weekend. Due to initiator limitations, the pull-down portion of this schedule runs before the daily schedule begins. A dummy job, CEPCS2EN indicates that jobs CEPCS110 thru CEPCS119 are complete. Therefore, CEPDAILY will have a job dependency upon CEPCS2EN on nights this schedule runs.   Please review the flow diagram for a complete list of jobs in this schedule.
